	Claims		NO

2. Citations and explanations

Claims 1-4, 6 and 7

Document 1 [JP, 11-231916, A (Mori Seiki Co., Ltd.)] cited in the ISR describes a numerically controlled apparatus in which a readable program is limited respectively in response to two passwords, and in the document, it is unknown (1) whether or not a password peculiar to the apparatus is used, (2) whether or not a program is selected on a program selection screen, or (3) whether or not the authenticity of the specific data stored in an external memory is identified. However, document 2 [JP, 1-197805, A (Mitsubishi Electric Corp.)] cited in the ISR describes that (1) a password peculiar to an apparatus is used, and (2) the authenticity of the specific data stored in an external memory is identified, respectively for achieving higher security, and document 3 [JP, 7-168611, A (Mutoh Industries Ltd.)] cited in the ISR describes that a program is selected on a program selection screen.

Therefore, the subject matters of claims 1-4, 6 and 7 do not appear to involve an inventive step in view of documents 1-3.

Claim 5

In the invention described in document 1, whether or not the specific data stored in an external memory is processed particularly using an external computer is unknown, but document 4 [JP, 61-52703, A (Fanuc Ltd.)] cited in the ISR describes that the data stored in an external memory is processed using an external computer.

Therefore, the subject matter of claim 5 does not appear to involve an inventive step in view of documents 1-4.
